

# Healthy & hassle-free convenience

Giving consumers access to truly healthy foods everywhere they go

[vegnoutnow.com](http://vegnoutnow.com)

Unlike any other on-the-go food option in the market, Veg'n Out Smart Coolers meet people where they are – at home, work, in the gym and more – with fresh juice, smoothies, eats and sweets that they will thank you for providing.

Turnkey and hassle-free to you, Veg'n Out maintains and manages all aspects of the Smart Cooler with real-time inventory and remote monitoring. One-touch support and quarterly reporting provides direct access and insight into the value your Smart Cooler delivers to guests and employees 24/7/365.

With minimal to zero start-up costs or on-going fees, your cooler can be in place and stocked within 30 days. Contracts are simple and even circumvent existing vending agreements you may have in place.

## How it works

1. Customer swipes, card is preauthorized & door unlocks
2. Customer interacts with products & closes the door
3. Exhaustive inventory before charging card for the items taken
4. Receipt sent (when email provided)
5. Customer feedback or support access by reply to the receipt

## What we stock

In addition to healthy treats from our Lake Nona retail store, we stock healthier versions of packaged treats that consumers know, love and expect:

UNREAL
